INDEPENDENT AUDITOR'S REPORT

To the Governing Board of the International Science and Technology Center

Opinion

We have audited the financial statements of the International Science and Technology Center (the "Company"), which comprise the statement of financial position as at December 31, 2025, and the statement of income and expenses, statement of movements in capital contributions and, statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2025, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) and ethical requirements that are relevant to our audit of the financial statements in the Republic of Kazakhstan. We have also fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

RSM Qazaqstan LLP is a member of the RSM network. Each member of the RSM network is an independent accounting and consulting firm. The RSM network is operated by RSM International Limited, a company registered in England and Wales.

Auditor's responsibilities for the audit of financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit

The engagement partner on the audit resulting in this independent auditor's report is Aisulu Narbayeva.

Statement of Movements in Capital Contributions
For the year ended December 31, 2025
(Thousands of U.S. Dollars)

Movements in capital accounts during fiscal years 2025 and 2024 are as follows:

a. Designated Capital Contributions ("DCC") – Projects are presented at the country level which summarizes funding parties and partners associated with that country.

Designated capital contribution – Projects represent amounts committed on signed projects net of project expenses incurred to date

	EU	U.K.	U.S.	Japan	Norway	JO	SG	Total
DCC projects - December 31, 2023 and January 1, 2024	$ 22,243	$ 183	$ 15,281	$ 1,154	–	–	2,027	$ 40,888
Transfers to statement of income and expenses	(4,192)	(147)	(4,466)	(1,021)	–	(22)	(252)	(10,100)
New projects signed during 2024	4,724	94	19,388	688	264	24	–	25,182
New project funded from commitments	(446)	–	(1,659)	–	–	–	–	(2,105)
Transfer from admin to DCC	–	–	5	–	–	–	–	5
Foreign exchange differences	(971)	(1)	–	–	–	–	–	(972)
Funding received in excess of closed project expenses transfer to UCC	–	–	(6)	(11)	–	–	–	(17)
DCC projects - December 31, 2024 and January 1, 2025	$ 21,358	$ 129	$ 28,543	$ 810	$ 264	$ 2	$1,775	$ 52,881
Transfers to statement of income and expenses	(7,622)	(48)	(5,676)	(828)	(88)	(2)	(596)	(14,860)
New projects signed during 2025	4,722	–	6,143	700	758	–	–	12,323
Transfer to UCC	(89)	–	(90)	–	–	–	–	(179)

1 ORGANIZATION AND BUSINESS

The International Science and Technology Center (hereinafter the "ISTC" or the "Company") was established in 1992. The agreement continuing the ISTC (the "Continuing Agreement") was signed on December 9, 2015 at the 61st Governing Board in Astana city, the Republic of Kazakhstan and fully ratified on December 14, 2017. The parties to the Continuing Agreement are the European Union, the United States of America, Armenia, Georgia, the Republic of Kazakhstan, the Kyrgyz Republic, Tajikistan, Japan, Norway, and the Republic of South Korea (the Parties). Funding parties, which contribute to the ISTC are the States parties, government and non-government partners.

The objectives of the ISTC are set forth in Article II of the Continuing Agreement. The ISTC develops, approves, finances and monitors science and technology projects for peaceful purposes, which are to be carried out at institutions and facilities located in the territories of the Parties. The projects may be conducted in states that are not Parties to the Agreement.

Based on Article IX of the Continuing Agreement, the Government of the Republic of Kazakhstan provides the ISTC with free office space and other facilities, along with maintenance, utilities and security for the facility. Since August 2014, the ISTC has occupied office space provided in kind by the Government of the Republic of Kazakhstan. The annual contribution included free rent, utilities and security services and is estimated at fair value of USD 166,930 in 2025 and USD 160,244 in 2024. These contributions are not reflected in the statement of movements in Capital Contributions.

The ISTC has been registered with the State Revenue Committee of the Ministry of Finance of the Republic of Kazakhstan (the Committee). The Committee established that the ISTC, as a part of "Diplomatic and consular representations", is not a corporate income taxpayer and is not obligatory to submit the declaration for the corporate income tax. Furthermore, the Committee recognized that the ISTC, in accordance with the Paragraph a) of the Article 34 of the Vienna Convention on Diplomatic Relations dated April 18, 1961, shall be exempt from all taxes, fees and duties, personal or property, state, regional and municipal.

2. MATERIAL ACCOUNTING POLICY INFORMATION

a. Basis of preparation

The financial statements are prepared in accordance with International Financial Reporting Standards (IFRSs), except as described below, and management has concluded that the financial statements present fairly the entity's financial position, movements in capital contributions and results of operations and cash flows.

International Accounting Standard (IAS) 16 *Property, Plant and Equipment* requires non-current assets to be capitalized; depreciated over their useful economic lives and derecognized upon disposal and IAS 38 *Intangible Assets* requires computer software costs and other intangible assets be capitalized and amortized over their useful economic life and derecognized upon disposal. Due to the project-based nature of ISTC's operations, management believes the application of these requirements would result in improper matching between the income contributed by the funding parties with the related expenses, and accordingly conflict with the fair presentation objective of these financial statements.

Non-current assets acquired for use by participating institutes as part of the projects and for use by sustainability program partners, as well as non-current assets acquired by the ISTC for the administrative needs, are charged to the Statement of Income and Expenses upon acquisition (project related equipment acquired in 2025 – USD 517 thousand; 2024 – USD 1,568 thousand *(Note 9)*. For the administrative needs ISTC acquired center facilities and equipment in 2025 – USD 68; 2024 – USD 68 *(Note 10)*.

In these financial statements, the statement of Comprehensive Income is called "the Statement of Income and Expenses" and the Statement of Changes in Equity is called "the Statement of Movements in Capital Contributions".

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Statement of Cash Flows is prepared based on direct method.

The financial statements have been prepared on a historical cost basis.

Going concern

The ISTC has prepared the financial statements on the basis that it will continue to operate as a going concern. As of December 31, 2025 available funds in Designated capital contribution amount to USD 38,242 thousand; 2024 – USD 52,881 thousand. The major funding Parties - the European Union and the United States of America commit to continue funding of existing and new projects.

These financial statements were approved by the Executive Director and the Chief Financial Officer on June 18, 2026 and presented for approval to the Governing Board. The Governing Board has also the power to reject the financial statements if it deems it necessary.

b. Functional and presentation currency and foreign currency transactions

The US dollar (or USD) is the functional currency for the ISTC. Accordingly, these financial statements have been prepared using U.S. dollars as the presentation currency. Use of the US dollar best reflects the economic substance of the transactions and circumstances of the ISTC. All financial information presented in US dollars has been rounded to the nearest thousand.

Foreign currency transactions are translated into US dollars at the exchange rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into US dollars at the European Central Bank for EUR currency and the National Bank of Republic of Kazakhstan for KZT currency exchange rates prevailing at the year-end date. Foreign currency translation gains and losses are charged to the Statement of Income and Expenses under Other expenses/Other income. The exchange rates applied at the period end for the principal currencies are as follows: EUR/USD 0,851 (2024: 0,958), KZT/USD 502.57 (2024: 523.54).

The unrealized exchange gain/loss from the revaluation of the bank account balances and accounts receivable from Parties/ Partners related to AOB, service contracts and completed projects in currencies other than US dollars was charged to the Undesignated Capital Contribution (UCC) accounts of the relevant funding Party/Partner. The unrealized exchange gain/loss arose from the revaluation of accounts receivable transactions due under project agreements and was charged to the DCC accounts of the relevant funder.

c. Project activity

The ISTC authorizes and funds various projects which are carried out at institutes or various organizations. Projects are financed by the funding parties and partners either individually or jointly. All project agreements include a maximum amount of funding to be provided by the funding parties or partners. ISTC's projects include sustainable capacity and capabilities building support programs. These programs are different from scientific research and technology projects in a way that they provide material and technical assistance to Partner Countries that participate in the programs to strengthen their legislative, institutional and educational/training frameworks.

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

The project activity is accounted for in the financial statements as follows:

Project recognition

Projects are initially accounted for upon the later occurrence of either the signing date of the project agreement between the ISTC, the recipient institutes and the partners or the project commencement date. Upon commencement of the project accounting, the total amount of the funding is credited to the relevant funding parties' designated capital accounts in proportion to the level of funding agreed to by each party. To the extent that the signed projects are not funded by advance payments from the respective funding parties, a receivable is recorded in the accounting records, which is subsequently covered by either transfers from Undesignated Capital Contributions Accounts or direct disbursement by the funding parties.

Project expenses

Project expenses consist of several main components: grants to scientists, comprehensive services for laboratory supplies, engineering and construction, travel, equipment and other expenses. The ISTC, being a non-profit inter-governmental organization, does not envisage that any economic benefits will accrue to it in the foreseeable future from the financing of these projects. Accordingly, all project costs incurred, including the purchase of project equipment, are charged immediately to the Statement of Income and Expenses. Projects are performed on a cost reimbursable basis, with a ceiling of funds specified in the project agreements.

Based on the project agreement the ISTC temporarily retains the payment of the allowable overheads for the individual projects, in accordance with the project agreements, until the submission, and acceptance of, the financial and technical reports prepared by the project recipients. The overheads retainage is recognized as part of amounts payable for projects that were completed in the reporting year.

When a project has been completed or terminated, any funds committed in excess of actual costs are credited back to the relevant funding parties' Undesignated Capital Contributions Account in the same proportion as the initial contributions from the Funding parties.

d. Revenue

IFRS 15 *Revenue from Contracts with Customers* deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. An entity adopts a five-step model to determine when to recognize revenue, and at what amount. The new model specifies that revenue should be recognized when (or as) an entity transfers control of goods or services to a customer at the amount to which the entity expects to be entitled. Depending on whether certain criteria are met, income is recognized:

- over time, in a manner that depicts the entity's performance; or
- at a point in time, when control of the goods or services is transferred to the customer.

A performance obligation is a promise to deliver a good or provide a service (or a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer). Additionally, it is provided that an asset will be recognized for the incremental costs of obtaining a contract with a customer if they are expected to be recovered. The current practices applied by the ISTC imply that there are no contract costs to be capitalized.

IFRS 15 also establishes the principles that an entity shall apply to provide qualitative and quantitative disclosures which provide useful information to users of financial statements about the nature, amount, timing, and uncertainty of revenue and cash flows arising from a contract with a customer.

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

The specific accounting policies for the ISTC's main types of income are explained below.

Project Revenues

Project revenues recognized during the year in the Statement of Income and Expenses are amounts equal to the total value of project expenditure incurred and expensed during the year. The revenues are transferred from the funding parties Designated Capital Accounts for Projects to the Statement of Income and Expenses.

Project revenues do not arise from contracts with customers where a 'customer' is a party that has contracted with an entity to obtain goods or services that are an output of the entity's ordinary activity. Therefore, revenue recognition model under IFRS 15 is not applicable for the project revenues recognized by the ISTC.

Partner Fees

Partner projects may be charged a fee of 10% of the total project cost for the services provided by the ISTC to administer the project. Revenues from partner fees meet the definition of the contracts with customers as stipulated under IFRS 15. Revenues from partner fees derived from contracts with customers are recognized based on compliance with performance obligations with customers. Partner fees reflect the transfer of services to funding parties at an amount that reflects the consideration to which the ISTC expects to be entitled in exchange for such services. Partner fees are recognized in the Statement of Income and Expenses upon receipt of the Partner Fees from the partners.

Agent vs. Principal

The ISTC has performed assessment over principal vs agent presentation under IFRS 15. The ISTC has concluded that it acts as a principal. The ISTC obtains control of a service performed by recipient institutes and directs this service by administering the projects and holds primary responsibility for fulfilling the specified service to the funding parties. During the project administration the ISTC has discretion in selecting suppliers and agreeing on the prices paid.

Operating income and expenses

Administrative and operating budget ("AOB")

Administrative and operating income recognized in the Statement of Income and Expenses during the year when appropriate administrative and operating expense incurred. The AOB amount approved by funding parties for the particular year and transferred from the funding parties' designated capital contributions to administrative and operating budget. Such income does not meet the definition of revenue from contracts with customers as per IFRS 15.

AOB operating expenses are charged to the Statement of Income and Expenses when incurred.

Income in excess of expenses is generally reallocated to the funding parties' undesignated capital contributions accounts in the same proportion as the administrative income contributions.

Supplemental operating budget ("SOB")

SOB is approved by the funding parties and partners to provide funding for activities that are outside the scope of the Administrative Operating Budget and not directly related to the implementation of projects.

SOB income is recognized in the Statement of Income and Expenses are amounts equal to expenses incurred during the year. Such income does not meet the definition of revenue from contracts with customers as per IFRS 15.

SOB expenses are charged to the Statement of Income and Expenses when incurred.

Any surplus in funds upon completion of the programs within the SOB is transferred to the funding parties' undesignated capital contribution account.

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

e. Capital management

The capital of the ISTC is represented by the net assets attributable to funding parties. The ISTC's objectives in managing capital are to safeguard the assets of the funding parties to enable the ISTC to continue as a going concern and enable the future funding of project expenditure.

All significant capital decisions such as project funding, transfers of capital, investment of capital and returns of capital to funding parties, require approval by the funding parties at meetings of the governing board or otherwise. The parties' funds are kept at the banks that are recommended by the ISTC's management and approved by the funding parties.

Designated capital contribution

Projects represent amounts committed on signed projects net of project expenses incurred to date.

Undesignated capital contributions

Undesignated capital contributions are amounts paid or committed by the funding parties which have not yet been designated for the operating budget or project purposes or are funding party income in excess of expenses from closed or terminated projects.

In the case of some projects funded by the European Union, the annual agreements are signed between the ISTC and the European Union and specifying the amount of funding allocated allows a certain proportion of project amounts to be invoiced upon signing the agreements and before the commencement of the individual projects. As a result, the invoices issued during the year are recognized in the financial statements by including them in the European Union's undesignated capital contributions account and amounts receivable from funding parties. Subsequently, when these projects are finally signed, an appropriation is made between the designated and undesignated capital contributions account.

f. Cash and cash equivalents

Cash and cash equivalents comprise of cash and cash deposits with original maturity of less than 3 months and subject to insignificant risk of change in value.

g. Prepayments

Prepayments include prepaid expense related to projects and to administrative and supplemental activities. The ISTC recognizes prepayments upon cash transfer for which the underlying asset will not be consumed until a future period. When the asset is eventually consumed, it is charged to expense.

h. Equipment and furniture

Equipment is acquired for the ISTC's own use or for the projects and other activities and are comprised of the following:

ISTC equipment

The costs of the ISTC's equipment, information technology related to purchases and facility improvements are charged to administrative expenses when acquired.

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Project equipment

Since the ISTC does not expect to derive any foreseeable economic benefits from the ownership of project equipment, expenses incurred for equipment under each project are recorded as an expense in the Statement of Income and Expenses together with other project expenses incurred during the year (see *Note 2a, 2c*).

Despite the fact that the ISTC does not consume economic benefits derived from the project equipment over the term of its useful life, the ISTC maintains ownership of the equipment during and beyond the period of project implementation.

i. Contingent assets and liabilities

Possible assets and obligations that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the ISTC and give rise to the possibility of future. The ISTC does not have either contingent assets or liabilities.

j. Employee benefits

Short-term employee benefits, including staff salaries and social security contributions to the staff in the Republic of Kazakhstan, vacation and other benefits are included in expenses on an accrual basis. The ISTC has no obligations to pay further contributions related to employee services in respect to payroll taxes and contributions outside the Republic of Kazakhstan and any pensions on the retirement of employees.

k. Taxation

Under the terms of the Continuing Agreement of the ISTC with the Republic of Kazakhstan government, the ISTC is exempt from the corporate income tax. In addition, the ISTC is exempt from custom duties and Value Added Taxes ("VAT") on imported goods and VAT exempt on purchases within the countries of the Parties to the Continuing Agreement.

l. Financial instruments

Financial Assets

The ISTC uses only non-derivative financial instruments as part of its normal operations.

Initial recognition and measurement

Financial assets include accounts receivable and cash and cash equivalents. Similarly, to the past practice all financial assets held by the ISTC are classified as instruments at amortized cost under IFRS 9. The ISTC determines the classification of its financial assets at initial recognition. All financial assets held by the ISTC are recognized initially at fair value plus directly attributable transaction costs.

Subsequent measurement

Subsequent to initial recognition receivables are measured at amortized cost using the effective interest method, less any impairment losses. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset. When calculating the effective interest rate, the ISTC estimates future cash flows considering all contractual terms of the financial instruments.

Derecognition

The ISTC derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the ISTC is recognized as a separate asset or liability.

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Impairment of financial assets

A financial asset is measured at amortized cost if the following two conditions are met:

- the assets are held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- its contractual terms give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal outstanding.

The ISTC assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. The ISTC recognizes doubtful debt impairment allowances based on an individual management assessment of the recoverability of each receivable. Receivables are recognized as balance sheet assets against capital contribution. Thus, loss given default (LGD) for trade and other receivables is equal to zero. Subsequently, expected credit loss (ECL) (ECL = PD * LGD * EAD where PD the probability of default and EAD the exposure at default) is also equal to zero. Given the nature of the ISTC funding providers, at the reporting date there was no direct exposure to potential impairment to be recognized in the Statement of Financial Position.

Given the short-term nature the ECL impact on cash and cash equivalents is assessed as not significant.

Credit risk exposures are summarized, and Fair values are calculated in *Note 14* to the Financial Statements.

Interest income

Interest earned on balances in the ISTC's bank accounts is reported in the Statement of Income and Expenses, using the effective interest rate method. Surplus interest is allocated to the funding parties' Undesignated Capital Contributions Accounts, distributed proportionally based on their respective cash balances. Any interest earned that amounts to less than $500 is retained by ISTC for administrative expenses. Interest attributable to U.S. Government funding parties is transferred to the U.S. Administrative Fee Account.

Financial liabilities

Initial recognition and measurement

The ISTC's financial liabilities include accounts payable (projects and Administration and project vendors).

Financial liabilities within the scope of IFRS 9 are classified as financial liabilities at amortized cost. The ISTC determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognized initially at fair value plus directly attributable transaction costs.

Subsequent measurement

After initial recognition, accounts payable are subsequently measured at amortized cost using the effective interest rate method. Gains and losses are recognized in the Statement of Income and Expenses when the liabilities are derecognized as well as through the effective interest rate method (EIR) amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR.

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the Statement of Income and Expenses.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

m. Use of estimates and judgments

The preparation of financial statements in conformity with IFRSs requires management to make judgments, estimates and assumption that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Although these estimates are based on management's best knowledge of current events and actions, actual results ultimately may differ from those estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period, in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Sources of estimation uncertainty:

Accounting policy applied to tangible and intangible assets

Please refer to *Note 2a, 2c and 2h* above.

Valuation of accounts receivable

There are a number of significant risks and uncertainties inherent in the process of monitoring financial assets and determining if impairment exists. These risks and uncertainties include the risk that ISTC's assessment of funding party's or debtor's ability to meet all of its contractual obligations will change based on changes in the credit characteristics or that the risk that the economic outlook will be worse than expected or have more of an impact on the counterparty than anticipated.

Receivables are valued according to the principle of prudence and recognized at net amount due less allowances for doubtful receivables.

Doubtful receivables allowances are recognized based on an individual management assessment of the recoverability of each receivable. Given the nature of the ISTC funding providers, at the reporting date there was no direct exposure to potential impairment.

Recognition of accruals

Accruals are established when it is certain that a past event has given rise to a present obligation (accrued liabilities) or present right (accrued income), but there is uncertainty about the amount payable or receivable. The estimate of the amount of a liability or asset requires management judgment in the selection of a proper calculation model and the specific assumptions related to the particular exposure.

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

n. New and amended standards and interpretations

The Company applied for the first-time certain standards and amendments, which are effective for annual periods beginning on or after 1 January 2025 (unless otherwise stated). The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Lack of exchangeability – Amendments to IAS 21

For annual reporting periods beginning on or after 1 January 2025, *Lack of Exchangeability* – Amendments to IAS 21 *The Effects of Changes in Foreign Exchange Rates* specifies how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments also require disclosure of information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

The amendments did not have a material impact on the Company's financial statements.

o. Standards issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. The Company intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

IFRS 18 Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18, which replaces IAS 1 *Presentation of Financial Statements*. IFRS 18 introduces new requirements for presentation within the statement of profit or loss, including specified totals and subtotals. Furthermore, entities are required to classify all income and expenses within the statement of profit or loss into one of five categories: operating, investing, financing, income taxes and discontinued operations, whereof the first three are new.

The standard requires disclosure of newly defined management-defined performance measures, subtotals of income and expenses, and it also includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements (PFS) and the notes.

In addition, narrow-scope amendments have been made to IAS 7 *Statement of Cash Flows*, which include changing the starting point for determining cash flows from operations under the indirect method, from 'profit or loss' to 'operating profit or loss' and removing the optionality around classification of cash flows from dividends and interest. In addition, there are consequential amendments to several other standards.

IFRS 18, and the amendments to the other standards, are effective for reporting periods beginning on or after 1 January 2027, but earlier application is permitted and must be disclosed. IFRS 18 will apply retrospectively.

The Company is currently working to identify all impacts the amendments will have on the financial statements.

2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

o. Standards issued but not yet effective (continued)

Other new and amended standards and interpretations that are issued, but not yet effective, are as follows:

- *IFRS 19 Subsidiaries without Public Accountability: Disclosures*
- *Amendments to the Classification and Measurement of Financial Instruments—Amendments to IFRS 9 and IFRS 7*
- *Annual Improvements to IFRS Accounting Standards - Volume 11*

These new standards and amendments are not expected to have a material impact on the ISTC's financial statements.

3. CASH AND CASH EQUIVALENTS

As at December 31 cash and cash equivalents comprised the following:

		2025		2024
Cash in current bank accounts and short-term deposits		29,814		49,972
	$	**29,814**	**$**	**49,972**

As of 31 December 2025 and 2024, cash and cash equivalents are placed in Kazakhstan and foreign banks. Interest rates earned on interest bearing deposits are in line with market rates prevailing in the countries of placement. For Euro-denominated deposits, rates range from 0.38% to 0.50% in both 2025 and 2024. For USD-denominated deposits, rates range from 1.00% to 3.80% in 2025 and from 1.00% to 4.40% in 2024.

4. RECEIVABLES FROM FUNDING PARTIES

As of December 31 receivables from funding parties comprised the following:

		2025		2024
Due within one year				
Funding parties and partners		23,850		15,845
	$	**23,850**	**$**	**15,845**
Due after one year				
Funding parties and partners		12,422		10,469
	$	**12,422**	**$**	**10,469**

5. PREPAYMENTS

As of Decembjulyer 31 prepayments comprised the following:

	2025	2024
Advances paid for services under projects	400	3,012
Project advances	10	328
Prepaid expenses-*operating*	1	32
	$ 411	**$ 3,372**

6. INTEREST RECEIVABLE ON DEPOSIT

Movements in interest receivable for 2025 and 2024 represent the following:

	2025	2024
As at 1 January	54	63
Interest income accrued in the Statement of Income and Expenses	471	289
Interest income accrued in the administrative operating budget of the Statement of Movements in Capital	284	400
Interest income received as reflected in the Statement of Cash Flows	(758)	(698)
As at 31 December	**$ 51**	**$ 54**

7. ADMINISTRATIVE REVENUE

The approved administrative budget for 2025 is $1,433 (2024: $1,330), with actual administrative expenses totaling $1,392 (2024: $1,328). The remaining $41 (2024: $2) has been recognized as deferred revenue and has been approved by the 79th Governing Board meeting for use in ongoing IT developments and new office.

8. OTHER INCOME AND EXPENSES

Other income and expenses during 2025 and 2024 consisted of the following:

	2025	2024
Unrealized foreign exchange gain (loss) - bank account balances	$ 1,241	$ (1,336)
Unrealized foreign exchange gain (loss) - accounts receivable from Parties/ Partners for AOB and service contracts and completed projects	$ 343	$ 287
Unrealized foreign exchange gain (loss) – accounts receivable from Parties/ Partners for projects	$ 1,736	$ (972)
Net unrealized foreign exchange gain (loss)	**$ 3,320**	**$ (2,021)**

The unrealized exchange gain of $1,584 in 2025 (2024: $1,049 - loss) from revaluation of the bank accounts and accounts receivable for AOB and service contracts in currencies other than US dollars was charged to the Undesignated Capital Contribution (UCC) accounts of the relevant funding Party/Partner. It is reported in the Statement of Income and Expenses under "Other income" or "Other expenses".

The unrealized exchange gain of $1,736 in 2025 (2024: $972 - loss) resulted from the revaluation of accounts receivable from funding parties. This amount was charged to the Designated Capital Contribution (DCC) accounts of the relevant funder and is also reported in the Statement of Income and Expenses under "Other income" or "Other expenses".

9. PROJECT EXPENSES

Project expenses charged to the statement of income and expenses for each year ended December 31 since the inception of operation in Kazakhstan are as follows:

Financial Year	Amount
2025	**$ 14,860**
2024	10,100
2023	8,994
2022	9,947
2021	13,977
2020	5,927
2019	9,869
2018	8,136
2017	4,938
2016	4,358
2015	4,353
Cumulative project expenses incurred as of December 31, 2025	**$ 95,459**

Cumulative project expenses since the relocation of the ISTC to Kazakhstan in 2015 amounted to $95,459 thousand (2024: $80,599 thousand) reflect actual expenses incurred on ongoing projects and completed projects.

Project expenses consisted of the following in 2025 and 2024:

	2025	2024
Engineering and technical services	3,172	282
Professional services	3,551	2,452
Grants to scientists	2,410	2,371
Travel	1,924	1,453
Laboratory material and supplies	1,054	248
Training and events	1,594	601
Equipment	517	1,568
Personnel	156	110
Comprehensive services for laboratory supplies services	–	143
Other project costs	482	872
	$ 14,860	**$ 10,100**

Other direct costs include logistics expenses, subscription fees, banking fees, and miscellaneous direct expenses

10. OPERATING EXPENSES

Operating expenses incurred during 2025 and 2024 consisted of the following:

	2025		2024	
	Budget	**Actual**	Budget	Actual
Administrative expenses				
Personnel	1,024	1,039	905	914
Center operations	323	308	339	330
Center facilities and equipment	68	68	68	68
Branch offices	18	18	18	18
	$ 1,433	**$ 1,433**	**$ 1,330**	**$ 1,330**

	2025	2024
Supplemental expenses		
Seminars	648	553
Management information systems	12	22
Expert participation		
United States	321	349
European Union	799	813
Japan	102	82
	$ 1,882	**$ 1,819**

11. FUNDING PARTY INFORMATION

Project related income and expenses during the year have been allocated to the funding parties as follows:

	Project Revenues	Supplemental Budget Revenues	Interest Income	Project Expenses	Supplemental Budget Expenses	Net Other Income (Expenses)	Total
2024							
EU	4,192	967	161	(4,193)	(967)	(2,021)	(1,861)
Japan	1,021	177	56	(1,021)	(177)	–	56
United States	4,466	675	53	(4,465)	(675)	–	54
Norway	–	–	2	–	–	–	2
South Korea	–	–	–	–	–	–	–
Singapore	252	–	15	(252)	–	–	15
Jordan	22	–	–	(22)	–	–	–
United Kingdom	147	–	2	(147)	–	–	2
	$ 10,100	$ 1,819	$ 289	$ (10,100)	$ (1,819)	$ (2,021)	$ (1,732)
2025							
EU	7,622		172	(7,622)	(866)	3,320	3,492
Japan	828	183	97	(828)	(183)	–	97
United States	5,676	833	172	(5,676)	(833)	–	172
Norway	88	–	9	(88)		–	9
South Korea	–	–	–	–	–	–	–
Singapore	596	–	18	(596)	–	–	18
Jordan	2	–	–	(2)	–	–	–
United Kingdom	48	–	3	(48)	–	–	3
	$ 14,860	**$ 1,882**	**$ 471**	**$ (14,860)**	**$ (1,882)**	**$ 3,320**	**$ 3,791**

All income in excess of expenses arising during the year have been allocated to the funding parties UCC accounts based on the funding levels of the sponsors.

12. AMOUNTS RECEIVED FROM FUNDING PARTIES

Amounts received during the year from the funding parties have either been recorded against accounts receivable or directly against the parties' capital contributions accounts. Such amounts received, and less transfer of funds back to funding parties, during 2025 and 2024 were as follows:

		2025		2024
EU		1,053		2,320
UK		44		–
Japan		828		732
United States		3,686		22,287
Norway		884		336
South Korea		50		14
Singapore		–		280
Jordan		12		16
Kazakhstan		100		100
	$	**6,657**	**$**	**26,085**

During the year ended 31 December 2025, the Organization refunded unobligated balances of Federal funds in accordance with the Termination Notification of Award SPMECO24GR00 in the amount of USD 13,309 thousand. In addition, unspent balances of USD 3 thousand under Award SISNCT22GR3027 and USD 1 thousand under Award SISNCT22GR0074 were returned to the US.

Furthermore, a total of USD 861 thousand was returned to the European Union in respect of completed projects, representing unspent advances. This amount includes USD 822 thousand related to agreement NDICI/2021/428-212, USD 34 thousand related to agreement 379-634, and USD 5 thousand returned to Expertise France.

13. FINANCIAL COMMITMENTS

As at December 31, 2025, financial commitment was pending for three approved by the Japan Party projects in the amount of $750 (2024 - $300 for pending one project approved by the Japan Party).

14. RELATED PARTIES

Other than the parties to the Continuing Agreement described in *Note 1*, there are no related parties. All transactions with related parties have been undertaken on arm's length terms.

15. FINANCIAL INSTRUMENTS

		2025		2024
Financial assets				
Cash and cash equivalents		29,814		49,972
Amounts due from funding parties and partners *(Note 4)*		36,272		26,314
Interest receivable on deposit		51		54
	$	**66,137**	**$**	**76,340**

		2025		2024
Financial liabilities				
Accounts payable		1,753		1,321
Grants payable to institutes		538		390
	$	**2,291**	**$**	**1,711**

Management of the risks is an essential element of the ISTC's operations. Due to the non-trading nature of the activities of the ISTC, the organization is not exposed to a high degree of the risks, as disclosed below:

Credit risk

Credit risk arises when one party to a financial obligation may fail to discharge the obligation and cause the other party to incur a financial loss. The maximum potential exposure to credit risk of the ISTC as of 31 December 2025 and 31 December 2024 is represented by the carrying amounts of financial assets as disclosed above. Given the nature of the ISTC funding parties which have established Undesignated Capital Contribution (UCC) accounts, the balances at the reporting date create no direct exposure to credit risk. The potential risk is presented in outstanding amounts due from funding partners that don't have UCC accounts and may fail to discharge obligations. As of 31 December 2025, the ISTC had outstanding receivables of $23,850 (2024 – $15,845), in current assets and $12,422 (2024 – $10,469) in non-current assets due from the funding partners.

Additionally, under the terms of project agreements concluded between the ISTC and the respective recipient institutes, project costs for a given period of time may not be claimed by a recipient institute if it has received project reimbursements from other funding sources for the same period of time. In case the project condition is breached, the ISTC may ultimately terminate the project and demand the return of all payments and goods previously provided. An institute's potential failure to return the funds and goods creates additional credit risk exposure to the ISTC. Recipient institutes' compliance with the above contractual condition cannot be readily verified as no related effective controls or supporting records can be implemented at the ISTC as relevant accounting records of the recipient institutes are not readily available. Nevertheless, such risk of potential reimbursed cost claims is considered remote by the ISTC.

Liquidity risk

Liquidity risk is the risk that ISTC will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. ISTC's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses, and maintain net working capital surplus. Practically all of ISTC's financial assets are formed of cash and cash equivalents that are available on demand; net working capital surplus is $51,794 thousand as of 31 December 2025 (2024 - $67,530 thousand). All carrying amounts of the financial liabilities as of 31 December 2025 and 31 December 2024 agree with the respective value of the contractual cash flows and the contractual maturities do not exceed 3 months.

15. FINANCIAL INSTRUMENTS (continued)

Currency risk

The notional amounts of financial assets and liabilities denominated in foreign currencies were as follows as at the reporting date:

	EUR	KZT	USD	GBP	CHF	KGS	Total
Financial assets as of December 31, 2025

	$ 818	$ 99	$ 1,271	$ –	$ 102	$ 1	$ 2,291

Net currency position as of December 31, 2025	**$ 30,577**	**$ (96)**	**$ 33,046**	**$ 256**	**$ 64**	**$ (1)**	**$ 63,846**

The notional amounts of financial assets and liabilities are disclosed for all currencies presented above. For the purpose of this sensitivity analysis, the impact of movements in exchange rates has been assessed only with respect to EUR-denominated monetary balances (significant), with all other currency exposures (not significant) held constant. A 10 percent weakening (strengthening) of the U.S. dollar against EUR at 31 December 2025 would have increased (decreased) excess of income over expenses and capital contributions by $3,058 thousand. This analysis assumes that all other variables remain constant.

Grants payable to institutes	–	–	390	–	–	–	390
	$ 806	$ 12	$ 892	$ –	$ –	$ 1	$ 1,711

Net currency position as of December 31, 2024	**$ 26,764**	**$ (11)**	**$ 47,486**	**$ 241**	**$ 150**	**$ (1)**	**$ 74,629**

The notional amounts of financial assets and liabilities are disclosed for all currencies presented above. For the purpose of this sensitivity analysis, the impact of movements in exchange rates has been assessed only with respect to EUR-denominated monetary balances, with all other currency exposures held constant

A 10 percent weakening (strengthening) of the U.S. dollar against EUR at 31 December 2024 would have increased (decreased) excess of income over expenses and capital contributions by $2,676 thousand. This analysis assumes that all other variables remain constant.

Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect the value of the financial instruments. ISTC manages interest rate risks by entering into deposit and current account agreements with interest rates that do not significantly differ from market rates. At the reporting date, the interest-bearing assets of ISTC were short-term deposits of $ 17,901 thousand (2024: $22,473 thousand).

15. FINANCIAL INSTRUMENTS (continued)

Fair values

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, or in its absence, the most advantageous market to which the ISTC has access at that date. The fair value of a liability reflects its non-performance risk.

When measuring the fair value of an asset or a liability, the ISTC uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Due to the short-term nature of ISTC financial assets and liabilities, the estimated fair values of all financial instruments of the ISTC approximate their carrying amounts as of 31 December 2025 and 2024 and are classified to Level 3 in fair value hierarchy.

16. SUBSEQUENT EVENTS

The State Institution "Science Committee of the Ministry of Science and Higher Education of the Republic of Kazakhstan" entered into a lease agreement with Assets, Logistics & Property Group LLP for new office premises to accommodate the ISTC. The office has been relocated to Business Center Syganaq, 70 Syganaq street, Astana, the Republic of Kazakhstan and the total contractual lease for 2026 amounts to USD 167 thousand, covering the period through mid-May 2026. The extension of this agreement, including additional funding through the end of 2026, has been under negotiation.
