

Project P244ENU

Short title:	«Expansion of cognitive competence in the field of strategic trade control»
Full name and purpose	<p>Expanding the cognitive competence of human capital of university professors, civil servants, business representatives in the field of strategic trade control in foreign economic activity (STC in foreign economic activity).</p> <p>Education in recent years is increasingly seen as a condition and resource for the development of the modern economy. This is due to the fact that the modern economy is becoming a knowledge-based economy, so the quality of education and new competencies of human capital come to the fore. European integration has set high standards for international cooperation in the field of education, lifelong learning is the dominant paradigm of communities.</p> <p>The world economy is in a turbulent state - at its epicenter - the transformation of the global financial architecture, which has led to a rethinking of cooperation mechanisms. New problems have appeared that need to be studied and taught to those concerned to conduct business correctly, to solve issues of customs administration.</p> <p>Therefore, the goal of the project is to improve the quality of the human capital of university teachers, civil servants, business representatives through training in the field of STC in foreign economic activity.</p> <p>The goal is specified in the following tasks:</p> <ul style="list-style-type: none"> - Development of working curricula for the disciplines of the educational program of the EP "International Business and STC"; - Holding a round table on the topic "The role of strategic trade control in ensuring the country's economic security"; - Preparation of a program and conducting trainings for teachers, civil servants and business representatives on the topic "Sanction Compliance"; - Conducting training for teachers of regional universities.
